

My husband bought me XM for our anniversary. I love it. I can't even stand to not be in my car because I am forced to listen to crap radio. We are in the process of putting one in our boat, our RV and my husbands truck. I am sure I am not alone in my views of XM. Quit being spineless, money hungry bureaucrats and listen to what the people want for once in your careers. My husband and I own 3 businesses and make over 150,000.00 a year. We also vote in every election. The FCC has a hard time reading and understanding what the constitution actually states. The beautiful concept is that we are FREE to make our own choices. Buy what we wan't, when we want and listen to the F--- word 4 thousand times a day on channel 150 if we so desire. Pull your heads out and leave XM alone!
